

Homeocentrum — Complete Feature Delivery

Mobile Applications • Web Platform • Payments • Telemedicine • Digital
Prescription • HomeoMeds

Prepared for Homeocentrum / NIGA

29 August 2026

Table of Contents

Prepared for: Homeocentrum / NIGA **Date:** 29 August 2026

This document lists everything that will be delivered, written in plain business language. It covers the mobile applications, the web platform, the payment system, the Account department, telemedicine, digital prescriptions and HomeoMeds.

1. WHAT WE ARE BUILDING

One connected ecosystem serving six types of users. A patient, an appointment, a prescription and a payment created anywhere in the system are visible everywhere else — there are no separate systems to reconcile.

Delivery covers: 2 mobile applications · 5 web portals · payment system · telemedicine · digital prescription · online medicine delivery.

2. PATIENT MOBILE APP (iOS & Android)

A complete patient application — find a doctor, book, pay, consult by video, receive the prescription and order medicines.

2.1 Getting Started

Feature	What the patient gets
Language selection	Choose preferred language on first open
Welcome & introduction	Guided introduction to the app
Mobile number + OTP login	Secure sign-in with no password to remember
Profile setup	Name, age, gender, contact and health basics
Privacy consent	Clear consent before any personal data is stored
Family members	Add family members under one account
Caregiver authorization	Let a family member book and manage on their behalf

2.2 Finding a Doctor

Feature	What the patient gets
Home dashboard	Personalised home with upcoming visits and quick actions
Search & care categories	Search by name, condition or category of care
Search results	Clear list of available doctors
Filters	Narrow by availability, fee, experience, language and location
Doctor profile	Full profile with qualifications, experience and consultation fee
Credentials & verification	Verified badge showing the doctor's credentials are checked
Ranking explanation	Transparent explanation of why doctors appear in a given order
Health articles	Educational content to build trust and engagement

2.3 Booking, Queue & Payment

Feature	What the patient gets
Slot picker	See real available time slots and choose one
Booking review & consent	Confirm details and consent before booking
Checkout	Pay the consultation fee inside the app
Payment status	Immediate confirmation of paid, pending or failed
Appointment detail	Full booking details in one place
Reschedule appointment	Move to another slot without calling the clinic
Cancel appointment	Cancel with reason, refund handled per policy
Waitlist offer	Get offered a slot when one is freed by a cancellation
Instant consult request	Request an immediate consultation with an available doctor
Queue & doctor offer	See position in queue and accept an offered doctor

2.4 Video Consultation

Feature	What the patient gets
Device check	Camera, microphone and network checked before the call
Waiting room	Wait with live status until the doctor joins
Live video consultation	Face-to-face consultation from home
Recording consent	Explicit consent requested before any recording
Fallback & join failure handling	Clear guidance if the call fails, with options to retry
Case-linked chat	Chat tied to the consultation, not a loose message thread
Consultation summary	Written summary available immediately after the call
Rejoin after dropped call	Rejoin the same consultation if the connection drops

2.5 Health Records & Prescription

Feature	What the patient gets
Records timeline	Complete visit history in date order
Consultation note	Doctor's notes for each visit
Signed digital prescription	Official prescription issued by the doctor
Document upload	Upload reports, scans and previous prescriptions

2.6 Follow-up & Continuity

Feature	What the patient gets
Follow-up plan & tasks	Clear next steps after each consultation
Symptom diary	Record symptoms between visits
Progress tracking	See improvement over time across visits

2.7 Medicines (HomeoMeds)

Feature	What the patient gets
Medicines tab	All medicine orders in one place
Order start	Start an order directly from the prescription
Pharmacy selection & quote	Choose a licensed pharmacy and see the price before paying
Order review & consent	Confirm and consent before the prescription is shared
Order tracking	Live status from accepted to delivered
Order detail & refill	Full order history and one-tap refill request

2.8 Account, Money & Trust

Feature	What the patient gets
Write a review	Rate and review the consultation
My reviews & appeal	Manage reviews and raise an appeal
Payments & refunds	Full payment history and refund status
Profile & settings	Manage personal details and preferences
Consent centre & data rights	View, manage and withdraw consents; request data
Notifications centre	All alerts in one place

2.9 Support & Access

Feature	What the patient gets
Help centre & support tickets	Raise an issue and track it to resolution
Physical clinic appointment	Book an in-person visit as well as online
Assisted booking	Help for patients who need support booking
Low-data mode	Works on slow or limited connections
Push notifications	Booking confirmations, reminders, doctor ready, prescription issued, order updates

3. DOCTOR MOBILE APP (iOS & Android)

A companion app so doctors can run their day from a phone. Detailed case-taking stays on the web portal where the full clinical tools are.

Feature	What the doctor gets
Login & identity	Same login and same account as the web portal
First-run onboarding	Guided setup, number confirmation and permissions
Notification permissions	Push, microphone and camera permissions handled properly
Today's queue & schedule	The full day at a glance
Availability toggle	Go online or offline, set working hours
Push notifications	Patient waiting, new booking, reschedule, cancellation, refill request, payment received
Patient context card	Name, age, chief complaint and last visit before joining
Join consultation	Start the video or audio consultation from the phone
Refill approval	Approve or reject repeat prescription requests
Earnings summary	Today, this week and this month, with payout status
Offline handling	Clear behaviour on weak connection or expired session
Reliability monitoring	Failures are reported automatically, not left to a phone call

4. PATIENT WEBSITE (PUBLIC)

Feature	What is delivered
Product home page	Complete public website presenting the service
Consultation & subscription pricing	Transparent pricing display
Doctor discovery	Browse and search verified doctors
Self-service booking	Book an appointment online without calling the clinic

Feature	What is delivered
Online consultation payment	Pay the consultation fee at the time of booking
Contact & enquiry form	Enquiries reach the admin team and are tracked
Privacy policy	Covering data protection, recording and pharmacy consent
Terms of service	Covering payments, refunds, telemedicine and medicine orders
Doctor self-registration	Doctors apply to join the platform online
Email activation	Secure account activation by email link

5. DOCTOR WEB PORTAL

5.1 Dashboard & Daily Operations

Feature	What is delivered
Doctor home dashboard	Complete overview of the working day
Patient counts & waiting list	Live counts by status with quick actions
Patient search, list & open case	Find any patient and open their case instantly
Add new patient	Register a patient in seconds
Import patients	Bring existing patient records in bulk
Export patients	Download patient data in Excel, CSV or PDF
Recent activity panel	Everything that happened recently, at a glance
Patient statistics charts	Visual practice statistics
Manage reception staff	Add, edit and remove reception users
Doctor profile	Clinic details, consultation fee, photo, qualifications, working hours, bank details

5.2 Appointments & Scheduling

Feature	What is delivered
Appointment list & waiting patients	Full day view with live status
Create new appointment	Book with visit type, consultation mode and fee
Appointment status update	Move patients through the visit stages
Appointment time update	Adjust timings as the day runs
Reschedule appointment	Move to a new slot with automatic patient notification
Cancel appointment	Cancel with reason, free the slot, trigger refund where applicable
Daily schedule setup	Define working days, hours and break times
Appointment slot grid	Visual slot-by-slot view of the day
Consultation payment status	See paid, unpaid or pay-at-clinic on every appointment

5.3 Clinical Workspace (Patient Board)

Feature	What is delivered
Clinical workspace	Single screen for the entire consultation
Manual case taking	Structured case taking
Body parts & intensity selection	Select affected areas and severity
Clinical questions	Guided questions by section, group and sub-group
Diagnosis, therapeutics & pattern search	Search diagnoses and linked therapeutics
Repertory rubric search & selection	Search and select from the full repertory
Manage selected rubrics	Review, edit and remove selected rubrics
Audio case taking	Record the consultation and receive suggested rubrics automatically
Improved rubric accuracy	Enhanced accuracy rules for audio-based rubric suggestions
Materia medica reference	Browse materia medica during the consultation
Allopathic drug side-effect lookup	Check side effects of conventional medicines
Repertorization & elimination	Full repertorization with elimination
Center of Gravity	New analysis identifying the central remedy of the case, with reasoning shown
Lab orders & lab entries	Order tests and record results
Appointment history notes	Notes recorded against each visit
Complaints & case details	Capture and store complaints and case details
Patient back history	Complete history of visits, notes, prescriptions and payments
Export case data	Download the full case in Excel or PDF
Session restore	Continue exactly where the doctor left off, across multiple patients
3D anatomy viewer	Interactive 3D body model linked to rubric search

6. RECEPTION PORTAL

Feature	What is delivered
Reception login	Secure staff access
Reception profile	Manage own profile details
Reception home dashboard	Purpose-built front-desk dashboard
Create patient	Register a walk-in patient quickly
Patient search & list	Find any patient instantly
Create & manage appointments	Full appointment management
New appointment	Book on behalf of the patient
Waiting queue management	Manage the live queue and call the next patient
Appointment status update	Update as patients arrive and are seen
Appointment time update	Adjust timings through the day
Reschedule appointment	Move a booking with automatic patient notification
Cancel appointment	Cancel with reason and free the slot
View doctor schedule	See the doctor's working schedule
Log case paper / chief complaint	Record the reason for visit before the consultation
Collect consultation payment	Take cash, UPI, card or payment link and issue a receipt

7. ADMIN PORTAL

7.1 Clinical Knowledge Management

Feature	What is delivered
Repertory sections	Manage repertory sections
Subsection & rubric tree	Manage the full rubric hierarchy
Rubric-remedy mapping	Map remedies to rubrics with author and grade
Remedy-linked rubrics	View all rubrics linked to a remedy
Language master	Manage languages
Body part master	Manage body parts
Intensity master	Manage intensity levels
Remedy master	Manage the remedy library
Remedy grade master	Manage remedy grading
Author master	Manage materia medica authors
Materia medica master	Manage the materia medica library
Materia medica heads	Manage chapter headings
Materia medica remedies	View remedy-wise materia medica
Diagnosis system	Manage diagnosis systems
Diagnosis therapeutics	Manage therapeutics
Diagnosis conditions	Manage conditions and linked rubrics
Drug system	Manage conventional drug systems
Drug group	Manage drug groups
Allopathic drug & side effects	Manage drugs with side effects and adverse reactions
Question section, group & sub-group	Manage the clinical questionnaire structure
Clinical question mapping	Map questions to body parts and rubrics
3D mesh key master	Manage 3D model references
3D section master	Manage 3D body sections
3D hotspots	Manage clickable points on the 3D model

7.2 Business Management

Feature	What is delivered
Admin dashboard	Live overview of the whole platform
Platform users	Manage all users with import, export and activation control
Roles & menu permissions	Control exactly what each role can access
Subscription packages	Manage doctor subscription plans
Doctor qualifications	Manage the qualification list
Lab & imaging test catalog	Manage the test catalogue
Doctor credentialing & verification	Review doctor documents and approve, reject or request more information before they can practise on the platform
Consult booking & payment reconciliation	Match every booking against every payment
Payment exception queue	Every failed or mismatched payment surfaced for action
Support ticket queue	All patient and doctor issues in one queue with assignment and resolution

Feature	What is delivered
Pharmacy partner management	Onboard and activate licensed pharmacies

8. ACCOUNT & FINANCE DEPARTMENT

A dedicated department with its own portal, so that all money is managed by Homeocentrum in one place — as required.

Feature	What is delivered
Unified transaction ledger	Every rupee that moves through the platform, in one record
Consultation payment reconciliation	Online payments and reception collections matched and verified
Medicine ledger	Medicine money tracked separately from consultation money
Settlement runs	Scheduled settlement of amounts due to doctors and pharmacies
Payout approval	Payouts released only after OTP-verified approval
Refund processing	Issue and track refunds
Payment exception handling	Investigate and resolve every failed or disputed payment
GST & invoice reports	Invoice numbering and tax reporting
Payee records	Bank and KYC details for doctors and pharmacies
Clinic collection view	Cash and UPI collected at reception, per clinic and per day

Separation of duties: the Account department controls money. Admin controls the platform and clinical data. Neither can perform the other's role, which protects both.

9. PAYMENT SYSTEM

Built on the principle stated in the requirement: **every transaction passes through Homeocentrum**, in the same way a food-delivery or quick-commerce platform holds all payments centrally.

Feature	What is delivered
Online consultation payment	Patient pays by card, UPI, netbanking or wallet
Reception payment collection	Cash, UPI, card or payment link with printed receipt
Consultation fee configuration	Each doctor's fee set and displayed to patients
Pay-at-clinic option	Book now, pay at the clinic where the doctor allows it
Doctor subscription payment	Buy and renew subscription packages
Medicine payment	Pay online or choose cash on delivery
Automatic payment verification	Payments confirmed by the bank, not by the patient's screen — nothing is lost if the app or browser closes
Payment status everywhere	Doctor, reception and patient all see the same payment status
Refunds	Processed and tracked against the original payment
Payment receipts & invoices	Issued for every transaction
Complete audit trail	Every transaction traceable end to end by Homeocentrum

10. TELEMEDICINE — VIDEO CONSULTATION

Full video consultation built into the platform. Patients consult from the mobile app; doctors consult from the web portal or the mobile app.

Feature	What is delivered
Doctor availability	Doctor sets online or offline status and working hours
Telemedicine waiting queue	Doctor sees who is waiting, for how long, and whether they have paid
Video consultation in browser	Doctor consults directly from the web portal
Video consultation on mobile	Doctor and patient both consult from the app
Device check	Camera, microphone and connection tested before joining
Waiting room	Patient waits with live status
Recording consent	Consent captured before the consultation; no recording without it
Rejoin after dropped call	Either side can rejoin the same consultation
Join failure handling	Clear fallback if the call cannot connect
Case-linked chat	Chat attached to the consultation record
Consultation summary	Issued to the patient at the end of the call
Instant consultation	Patient can request an immediate consultation with an available doctor

11. DIGITAL PRESCRIPTION (eRx)

The prescription becomes a proper digital document — structured, signed, permanent and safely shareable.

Feature	What is delivered
Potency module	Every remedy carries a defined potency, selected from a managed list — no free text
Dosage details	Frequency, duration and instructions recorded clearly
Visit notes kept separate from the prescription	The doctor's private clinical notes never appear on the prescription given to the patient or pharmacy
Signed digital prescription	Issued and locked once signed, so it cannot be altered afterwards
Prescription history	Every prescription stored against the patient and visit
Patient view in app	Patient sees the prescription immediately in the app
Print & PDF	Printable and downloadable prescription
Remedy code protection	The patient sees remedy codes rather than remedy names until a licensed pharmacy accepts the order
Reveal on pharmacy acceptance	Once a pharmacy accepts and verifies by OTP, the remedy names and price are revealed and a payment QR or link is generated
Repeat prescription / refill	Patient requests a refill; doctor approves or rejects from the mobile app
Lab orders	Tests ordered alongside the prescription

12. HOMEOMEDS — ONLINE MEDICINE DELIVERY

A licensed pharmacy network connected to the prescription, with Homeocentrum holding the money and the record.

Feature	What is delivered
Pharmacy partner onboarding	Licensed premises registered with licence records and an activation checklist
Licence gating	Pharmacies with expired or suspended licences are blocked automatically from receiving orders
Fulfilment consent & pharmacy selection	The patient chooses the seller and consents before the prescription is shared
Prescription handoff	The signed prescription becomes the order directly — no re-entry, no transcription errors
Rule-based seller routing	Orders routed by licence validity, service area, working hours and capacity
Manual stock confirmation	The pharmacy confirms availability — no live inventory integration required
Pharmacy console	Accept or reject orders, enter the price quote, mark ready and dispatched
Quote before payment	The patient always sees the price before paying
Payment or cash on delivery	Both options supported, with status tracking
Order tracking	Live status for the patient at every stage
Medicine ledger	Seller, platform and delivery shares recorded separately from consultation money
Order exception queue	Stuck, rejected or failed orders are always surfaced to the operations team — never silent
OTP-based control	Key actions verified by OTP so Homeocentrum can monitor and trace every transaction
Refill orders	Repeat orders raised from an existing prescription

13. TRUST & VERIFICATION

Feature	What is delivered
Doctor credentialing	Doctors upload qualification and registration documents for review
Verification review	Admin approves, rejects or requests further information
Verified badge	Patients see which doctors have been verified
Practice gate	Only verified doctors appear to patients and take paid consultations
Patient reviews	Patients rate and review consultations
Review appeal	Doctors can appeal a review
Ranking transparency	Patients are shown why doctors are ranked as they are

14. COMMUNICATION & NOTIFICATIONS

Channel	What is delivered
SMS	Appointment confirmation, registration confirmation, doctor-unavailable notice, OTP, reschedule and cancellation alerts
WhatsApp	Templates, offers, health tips and bulk messaging to patients, with delivery reports and opt-out
Push notifications	Booking confirmed, payment received, doctor ready, prescription issued, order updates, refill requests
Email	Registration, activation, password reset, invoices and receipts
In-app notification centre	All alerts collected in one place for patients and doctors

15. SUPPORT & HELP DESK

Feature	What is delivered
Patient support tickets	Patients raise issues from the app and track them
Doctor support tickets	Doctors raise issues from the portal
Admin issue queue	All issues in one queue with priority, assignment and status
Ticket conversation	Full message thread with attachments
Enquiry management	Website enquiries reach the admin team and are tracked
Help centre	Self-service help content for patients
Assisted booking	Support for patients who need help booking

16. REPORTS & ANALYTICS

Report	What it shows
Admin overview dashboard	Platform-wide activity at a glance

Report	What it shows
Doctor practice statistics	Patient and consultation trends
Follow-up analysis	Which patients are due or overdue for follow-up, and follow-up conversion
Clinic performance analysis	Appointments, slot utilisation, no-shows, cancellations, waiting time and revenue
Payment reconciliation report	Bookings matched against payments
Settlement & payout reports	Amounts due and paid to doctors and pharmacies
GST & invoice reports	Tax reporting
Doctor earnings summary	Daily, weekly and monthly earnings with payout status
Medicine order reports	Order volumes, fulfilment and exceptions

17. SECURITY & DATA PROTECTION

Feature	What is delivered
Secure login	Protected credentials for every user type
Secure password reset	Time-limited reset links
Session control	Proper sign-out across web and mobile
Role-based access	Each role sees only what it is permitted to see
Patient data protection	Health records restricted to the treating doctor and the patient
Consent records	Every consent captured, stored and reviewable
Consent centre & data rights	Patients can view, manage and withdraw consent
Secure documents	Prescriptions, reports and uploads protected from unauthorised access
OTP verification	Applied to sensitive actions including payouts and pharmacy acceptance
Complete audit trail	Who did what, and when, across payments, prescriptions and approvals

18. SUMMARY OF DELIVERY

Area	Delivered
Patient mobile app	iOS and Android — onboarding, discovery, booking, payment, video consultation, records, prescriptions, follow-up, medicines, reviews, support, notifications
Doctor mobile app	iOS and Android — queue, availability, notifications, patient context, video consultation, refill approval, earnings
Patient website	Public site, doctor discovery, self-service booking and online payment
Doctor web portal	Dashboard, patients, appointments, scheduling, full clinical workspace, telemedicine, outreach, analytics
Reception portal	Front desk, queue management, appointments, case paper and payment collection
Admin portal	Complete clinical knowledge management, business management, credentialing, reconciliation and support
Account department	Unified ledger, reconciliation, settlements, payouts, refunds, tax reporting
Payment system	All payments collected and held by Homeocentrum, every transaction traceable
Telemedicine	Video consultation across web and mobile with consent and rejoin
Digital prescription	Potency, signed prescriptions, notes separated, remedy codes protected
HomeoMeds	Licensed pharmacy network, routing, quotes, payment, tracking and separate medicine ledger
Trust, support & analytics	Credentialing, reviews, support desk and full reporting

All features listed in this document are included in the delivery scope.
